

THE ENERGY VIBE

REVOLVE invites you to a dynamic networking event marking the launch of its 56th Magazine Issue on 11 June (17:00 CET) at Press Club Brussels Europe (Rue Froissart 95, 1040 Brussels)

Brussels, 02 June 2025 – As the demand for energy surges in an increasingly digital world, new questions are emerging about how we power our future. From the rapid rise of AI-driven data centres to the growth of local energy communities, the challenge lies in balancing innovation with sustainability.

Join us for dynamic discussions at [The Energy Vibe](#) on 11 June, from 17hrs as we officially launch [REVOLVE](#) Magazine's summer edition focusing on energy. This exclusive event will unpack the reshaping of the energy landscape, with fresh reporting and expert commentary on pressing topics such as the environmental footprint of AI, how we can meet the energy needs for industrial electrification and the wider implications for Europe's energy future.

AI Power Dynamics

A distinguished lineup of speakers will kickstart the discussion, including:

- Christiane Mann, Head of Industry Affairs, Siemens Smart Infrastructure
- Nicolás Marín, Journalist & Content Creator, REVOLVE

With over 20 years of experience as a global Strategy and Marketing Leader in the Clean Energy Transition and Smart Buildings space, **Christiane Mann** will discuss the possibilities of Artificial Intelligence across various sectors, such as friction around the environmental impact of data centres and power grid automation potential.

Nicolás Marín will join her on stage to discuss his research on the sprawling data centre facilities which have setup in Spain with the promise of local jobs. These power thirsty centres require tens of millions of cubic metres of water each year to cool their processing systems which has raised questions and opposition in one of Europe's most drought-threatened nations.

Unpacking the EU Sustainable Energy Week

Coinciding with [EU Sustainable Energy Week](#), as proud Media Partners, we want to take this opportunity for media to hear directly from industry experts, connect with fellow reporters, and unpack the latest in the EU's agenda.

REVOLVE is driving strategic communications for 10 cutting-edge EU-funded projects advancing energy transition and climate resilience. From decarbonising resource-intensive industries to scaling renewable energy facilities and building resilient communities, we invite you to learn more about [COMANAGE](#), [CoolLIFE](#), [ReLIFE](#), [RE-SKIN](#), [ESCALATE](#), [LEAPto11](#), [ICARUS](#), [AT LAST](#), [PVOP](#), and [HySeas](#).

Additional experts from some of these projects will be available for interviews:

- Claudia Carani, Senior Expert at the Energy and Sustainable Development Agency
- Simon Pezzuto, Project Coordinator, EURAC
- Cristina Ramos and Camila Navarro, Project Coordinators, COMANAGE

We warmly invite you to join us in this important conversation and help amplify the message of energy efficiency in EU electrification. To confirm your attendance, please register [here](#).
