

Towards Climate-Neutral and Resilient Cities

Accelerating the Transition of Local Authorities through Support and Training

AT LAST is an EU-funded project that supports European medium and small-sized cities in implementing Sustainable Energy and Climate Action Plans (SECAP). The project focuses on bringing different sectors together and assisting local governments in planning, financing, and carrying out their strategies to establish climate-neutral and resilient cities.

AT LAST will build capacities with a training programme in 25 local governments in four pilot networks (Italy, the Netherlands, Belgium, and Sweden) on how to plan and implement local energy and climate action strategies. The project will extend networking and support opportunities to a hundred municipalities through Communities of Practice (CoP) across Europe.
